Berk Yasar

I am an experienced Frontend developer with an academic engineering background in Chemical Engineering, bringing a unique blend of analytical approach and creative problem-solving skills to the domain of Web Frontend Development. My passion for coding and my constant quest for learning in the always-changing tech world have shaped my career path.

Over the past three years, I have played an important role in supporting large enterprises, facilitating seamless experiences for millions of unique visitors to their websites on a monthly basis. In my current role at a global SaaS company, I am actively involved in crafting a fully customizable marketing app tailored to the diverse needs of our customers. This experience has shaped my ability to deliver cutting-edge Frontend solutions that not only meet but exceed the expectations of both stakeholders and end-users.

Throughout my career, I've been driven by curiosity, a strong desire to learn, and a firm dedication to doing excellent work. Thriving in dynamic, collaborative environments, I leverage exceptional communication skills to engage effectively with stakeholders and customers.

I am eager to contribute my expertise in modern Frontend development techniques. To gain a robust insight into my skills. Explore my GitHub repository at github.com/berkysr/react-social-media-app, where I've contributed to the open-source community, aiming to assist fellow frontend developers.

WORK EXPERIENCE

Insider (Istanbul)

Frontend Web Developer

Oct 2022 - CURRENT

- Within my role in a department at Insider, I am responsible for a specific product that requires continuous development of new features. These features encompass a wide range of technologies, including Vue, React, Laravel, PHP, JavaScript, TypeScript, and various frontend and backend technologies. Additionally, I possess expertise in writing APIs, utilizing design systems in frontend development, and improving legacy web technologies. My versatile skill set enables me to navigate diverse technology stacks and contribute to the seamless growth and enhancement of the product.

Technologies: JavaScript, React, Vue, TypeScript, Redux, Laravel, Jest, HTML5, CSS3, Tailwind CSS, *CI/CD*, AWS, Git, npm, JIRA, Agile, Scrum

TECHNICAL SKILLS

JavaScript, TypeScript, React, Vue, Laravel, Redux, REST API, HTML5, CSS3, CSS Preprocessors, CSS Flex, CSS Grid, Tailwind CSS, Bootstrap, Material UI, Mobile-first principle, Responsive web design, Cross-browser compatibility, Debugging, Jest, Cypress, CI/CD, Git, Agile, Scrum, Kanban

SOFT SKILLS

Problem-solving,
Active team member,
Curious,
Flexible thinker,
Detail-oriented,
Quick learner,
Responsible

LANGUAGES

English
Full Professional Working Proficiency

Turkish
Native Proficiency

EDUCATION

Istanbul University - *BSc*

2013- 2020
Chemical engineering graduate.

JavaScript Team Lead

Nov 2021 - Oct 2022

– In this role, I held a primary responsibility as a mentor for other developers, providing technical support and guidance for their tasks. Through effective mentorship, I facilitated knowledge sharing and promoted best practices, while also leveraging my expertise in JavaScript, and agile methodologies to deliver high-quality solutions that met stakeholder requirements.

Technologies: JavaScript, HTML, CSS, AWS, Docker, JIRA, Vue, React, Vuex, Tailwind CSS, Bootstrap, HTML5, CSS3, Git, npm, JIRA, Kanban

JavaScript Developer

Dec 2020 - Nov 2021

– In my role as a JavaScript developer, I actively contributed to the development of new web page features based on requests from stakeholders and business partners. By leveraging my expertise in JavaScript, I implemented robust and scalable solutions. I worked closely with stakeholders to gather requirements, ensuring seamless integration with existing systems and optimizing performance through efficient code implementation.

Technologies: JavaScript, HTML5, CSS3, AWS, Docker, JIRA, Kanban

PROJECTS

React Social Media App — *Open-Source*

– A React-based social networking application resembling popular platforms. This showcase project demonstrates essential features including user authentication, profile management, a dynamic news feed, a friendship system, and real-time updates. The app is designed with a responsive interface for seamless usage across various devices.

– React Social Media App is a well-thought-out organization that reflects my commitment to scalability, maintainability, and efficient development practices.

Technologies: JavaScript, StyleLint, SCSS, TypeScript, ReactJS, Redux, Formik, Yup, Material UI, ESlint, i18n, A11Y, Prettier, Jest, React Testing Library, Cypress, Husky, Tailwind CSS
